Two Simple Fixes [1]

March 13, 2014 by Carl Sorenson [2]

These two changes will migrate to production this weekend, assuming no problems are found in testing. As always, you are invited to test these in Cognos QA [3].

1. **m-Fin FINANCIAL DETAIL.** The speedtype *code* column in the dataset output formats (MSExcel 2007 Data, and CSV) had both the speedtype code and the description. Now it has been corrected to be just the speedtype code.
2. **m-Fin ACCOUNTING SUMMARY BY SPEEDTYPE.** The account codes on the second page of the report were in random order. Now they are sorted.
