

Cvent | Confirming Emails Were Delivered ^[1]

October 5, 2016 by [Melanie Jones](#) ^[2]

1. **Access your reports.** Begin by selecting your event. Hover over **Reporting** and, under **Reports**, click **Standard Reports**. Click **Email Rates by Email**. It may take a few minutes for your report to process.
2. See how many were delivered and opened. The **Totals** section summarizes the following for every email sent from this event:
 - **Sent** shows you how many successfully arrived in an inbox.
 - **Undeliverable** tells you how many bounced back.
 - **Undeliverable Rate** divides the number you sent by those that bounced. You want this number to be low, around 10%.
 - **Opened** shows you how many recipients actually opened your email (and presumably read it).
 - **Open Rate** divides the number you sent by those that were opened. The higher the better. The average open rate for Cvent emails is 28%.
