Department Body

The Boettcher Foundation Webb-Waring Biomedical Research Awards Program supports early career investigators whose research has a direct impact on human health. The biomedical research supported pursuant to this grant program will be designed to find ways to prevent disease and improve human health through basic and applied biomedical research. The intent of the program is to fund meritorious research that has the potential for new discoveries or advances a discovery to the proof of its potential value as an application to improve human health. This research will improve the understanding, treatment and prevention of human disease. Awardees will carry the prestigious title of Boettcher Investigator.

CU's sixty-five Boettcher Investigators have been awarded a total of \$15,130,000 since the program was initiated in 2010. See all CU Boettcher Investigators [1].

CAMPUS-SPECIFIC DEADLINES

Applications must be submitted to your campus Grants office by the campus-specific deadlines included in the campus-specific instructions:

- CU Boulder [2] (*Updated 01/16/2024*)
- CU Colorado Springs [3]
- CU Denver | Anschutz Medical Campus [4]

Campus Grant Offices must submit final completed applications to the President's Office by March 1, 2024.
