## Color specifications

Color is an important part of our visual system. Specific signature colors are combined to create a unique signature for each University of Colorado campus.

To maintain consistency in our visual identity system, it is essential to reproduce our colors accurately. Always follow the CMYK, RGB and web/hex values shown on this page.

Other colors can be used in CU communications as accents in support of the primary color palette. However, all communications should feature the colors specified on this page to ensure consistency and promote the CU visual identity.

**Additional details are available in the [brand identity standards for each campus](#)<sup>[1]</sup>.**
