## **CU programs ranked in magazine's 2011 'Best Colleges' issue** <sup>[1]</sup>

August 17, 2010

DENVER—University of Colorado campuses and undergraduate programs remain well-regarded at the regional and national levels among public and private universities, according to the 2011 edition of U.S. News & World Report's Best Colleges.

The University of Colorado at Colorado Springs tied for seventh place among the top public universities in the West. The University of Colorado at Boulder ranked in 39th place among the top 50 'Best Public National Universities,' and the University of Colorado Denver's downtown campus ranked 106 among the top national public universities. Other highlights include:

• UCCS's undergraduate engineering program tied for seventh place among universities whose highest degree is a bachelor's or master's.

• CU-Boulder's undergraduate engineering program came in at 18th place among public universities whose highest degree is a doctorate.

• CU-Boulder's undergraduate business program came in at 22nd overall among public universities.

U.S. News & World Report rankings are based on its measures of academic peer assessment, graduation and retention rates, faculty resources, student selectivity, financial resources and alumni giving. According to the magazine's editors, 'national universities' are the 262 U.S. universities (164 public and 98 private) that offer a wide range of undergraduate majors as well as master's and doctoral degrees.

The rankings are available at [www.usnews.com/colleges](http://www.usnews.com/colleges) <sup>[2]</sup>. Highlights of the magazine's annual rankings of more than 1,400 colleges will appear in its September issue, which will be available on newsstands on Monday, Aug. 31. The magazine's 2011 Best Colleges guidebook will be available in bookstores and on newsstands on Aug. 24.

The University of Colorado is a premier public research university with four campuses: the University of Colorado at Boulder, the University of Colorado at Colorado Springs, the University of Colorado Denver and the University of Colorado Anschutz Medical Campus. More than 56,000 students are pursuing academic degrees at CU. The National Science Foundation ranks CU eighth among public institutions in federal research expenditures in engineering and science. Academic prestige is marked by the university's four Nobel laureates, seven MacArthur 'genius' Fellows, 18 alumni astronauts and 19 Rhodes Scholars. For more information about the entire CU system, and to access campus resources, go to [www.cu.edu](http://www.cu.edu) <sup>[3]</sup>.
