Production Services - Business Calendar and Standard Availability ^[1]

Visit our **UIS Business Calendar** ^[2] for critical production processing dates. (Note: You must have a login to access this tool. Employees needing access should contact the [UIS Service Desk](#) ^[3].)

Standard Availability ? Monday through Friday 7 a.m. to 6 p.m

The PeopleSoft systems are not available past 6 p.m. This time is needed for migration of software and batch processing. However, the transaction and reporting systems are generally available earlier than 7 a.m.

Standard Weekend Availability

The PeopleSoft systems are generally active and available (but not guaranteed) for online users on Saturday and Sunday, and users may access the system during these times. No technical support is available during weekend hours. Additionally, systems are scheduled to be unavailable on some weekend days to allow for migration of software or for hardware maintenance.

If you have a special request for weekend access, please contact Christine Bauder (303-860-4334) to discuss availability. We will make every effort to adjust our schedule so that users can get their work done.

Send your comments, corrections, suggestions to: [Production Services](#) ^[4]
