How to Connect to CUSystem Wireless

**PURPOSE:**
- How to Connect to CUSystem Wireless using Android 9 Pie

**HOW TO CONNECT TO CUSYSTEM WIRELESS:**

|	
From the home screen, begin by swiping down from the top to show the Quick Settings Menu. Long press on the Wi-Fi icon in the top left to show the Wi-Fi settings menu and available Wi-Fi networks. Alternatively, open Settings from the App Drawer, click on Network & Internet and then choose Wi-Fi.	
Select CUSystem from the menu to open the settings.

To connect, enter the following information:
- Under CA Certificate, select "Use System Certificates" from the dropdown.
- In the Domain field, enter "AD.CU.EDU" (this is not case-sensitive).
- In the Identity and Anonymous Identity fields, enter your CU username (lastnamefirstinitial)
- In the Password field, enter your CU system password.

Once the information above matches the example, click Connect and the screen should change to show the network connecting.

It may cycle through saving, obtaining IP address, and connecting before resting on connected. This is normal. The phone should also show a full Wi-Fi icon in the upper notification bar.

You know you have connected your device to the CUSystem Wi-Fi when you see the words "Connected" under CUSystem.

Please follow best practices in browsing and security.
