

- This is the total number of “telehealth interactions” that CU health providers have with patients per year.
- The use of communication technology to overcome barriers of time and location to deliver health care services.

THIS METRIC LEADS

CU Favorability Rating,
Economic Impact

Telehealth interactions are activities such as e-consults, remote patient monitoring, and image transmissions that are conducted on technology-based platforms. This does not include phone calls.

Telehealth Services are counted by tracking billable codes provided by the Center for Medicare and Medicaid Services (CMS). This demonstrates growth in long distance clinical healthcare provided by CU Medicine staff.
