

Energy Use Intensity

Definition and Action Steps

EUI expresses a building's energy use as a function of its size. EUI is expressed as energy per square foot per year.

In the Strategic Plan, campuses committed to three action steps:

1. Standardize the way that campuses calculate EUI
2. When possible, create or maintain a fund at the campus-level to finance green initiatives
3. Upgrade 1800 Grant parking garage and stairwell lighting to LED

Fiscal Strength: Progress to 2026 Goal (Final – Presented June 2022)

Energy Use Intensity – Goals (with 2020 actuals)
