

Camp Risk Assessment and Emergency Planning Checklist

This checklist is a tool for University departments sponsoring, conducting or coordinating camps to identify and assess risk and prepare to respond to an emergency. Refer to the University Risk Management Camp Activities Guidelines for definitions and an expanded explanation of risk minimization principles. The type of activity, location, age and number of participants, modes of transportation, etc., will determine the extent of planning needed. Please respond to the various points with appropriate information and documentation. Forward a copy to your approving authority and campus [Office of University Risk Management](#) (URM) for review.
