DATA GOVERNANCE OPERATING MODEL
Work-in-Progress ←

IT Governance   All governance issues feed into CU's IT Governance Committee as an escalation point.

Data Governance Executive Council

One data executive per campus and CU System will consult with Trustees and Stewards prior to voting on multi-campus data decisions and multi-campus data governance priorities.

The executive council collaborates with data trustees and executive subject matter experts.

Data Trustees

One owner per domain per campus will be consulted by the Data Governance Executive Council for domain specific decisions.

Executive Subject Matter Experts (SMEs)

Identified and consulted as needed for specific Data Governance Executive Council decisions.

Data Stewardship Councils – One per business domain

One data steward and one data custodian per campus and CU System will consult with subject matter experts and working groups (if available) on business domain-specific, multi-campus data decisions.

These councils report up to the Data Governance Executive Council.

CURRENT COUNCILS:

- Student Data Stewardship Council
- Institutional Research Stewardship Council
- Financial Resources Stewardship Council

FUTURE COUNCILS:

- Employment Information Stewardship Council
- Research Administration Stewardship Council
- Faculty Information Stewardship Council
- University Advancement Stewardship Council
- Campus Resources, Services and Facilities Stewardship Council

Subject Matter Experts

All Data Stewardship Councils will engage SMEs, as needed.

Working and Data Management Groups

Groups may be established or continue to help Stewardship Council(s) to address specific priorities and will disband once the priority is addressed.

Community of Practice

This network is made up of subject matter experts (SMEs) and other stakeholders who are interested in data governance. They are informed of Data Governance discussions and may be consulted by Operating Model groups, if needed.
