How to Connect to CUSYS Guest Wireless

**PURPOSE:**
- How to connect to CUSYS-Guest Wireless on a laptop or mobile device

CU System's guest network at 1800 Grant requires users to agree to an acceptable use policy (AUP) instead of inputting a password.

An AUP is a digital guardrail. It details the usage guidelines for CU's Wi-Fi network and heightens the protection of sensitive university data. The new AUP brings CU System's guest Wi-Fi access process into alignment with the campuses' processes.

How to connect to the CUSYS Guest Wi-Fi on your laptop:

|	
1.	Select the **Wi-Fi symbol** in the bottom right of your desktop.
2.	Select **CUSYS-GUEST** and click Connect.
3.	You will be automatically redirected to the AUP page or prompted to open the page in your browser.
4.	Click **Accept** at the bottom of the page.
5.	Another page will open, confirming that you are connected to the network. After 5 seconds, this page will refresh and redirect you to cu.edu. You are now fully connected.

Note: Depending on your operating system, your browser may automatically open the AUP after connecting to the network, or you may have to open a browser manually. Usually, your device will prompt you to open the page when in the **Manage Wi-Fi Connections** panel.

Mobile Devices

If you are connecting a mobile device to the network, you may be prompted to "sign into network." This is the same as opening a browser and accepting the AUP on a laptop or PC.

On an iPhone, click your **Settings** icon. On an Android device, open **Settings** and click on **Network & Internet,** then choose **Wi-Fi**. Alternatively, you can swipe down from the top to show the **Quick Settings Menu** and click on the **Wi-Fi ico**n as shown.	
In the Settings menu, click on **Wi-Fi**.	
In the menu, choose **CUSYS-Guest**.
