Existing West Elevation (ECME)

Proposed West Elevation (ECME)

To us, the proposed new windows honor the rigor of the original building by filling up a complete structural bay with four hooded windows—part of the original building’s “kit of parts.” A more explicit homage to the original building might also stack the same four windows on Level 2 above, but that may not be warranted and will certainly cost more. Recent modifications to fenestration at Level 1 in the courtyards have set the precedent that Level 1, with all of its community space, can and should be treated differently than other floors.
