WHERE TO FILL YOUR PRESCRIPTIONS WITH CVS CAREMARK

Anthem plan members enrolled in Exclusive, Extended and High Deductible have multiple options to fill their prescriptions through CVS Caremark, depending on the type of medication. Follow this chart to help determine the best in-network pharmacy for you and your needs:

**CVS Retail Network Pharmacies**
This **national network** of 68,000 locations includes all major national chains and many independent pharmacies.

**When to use:**
- Short-term medications (antibiotics, etc.)
- Up to a 30-day supply for non-specialty prescriptions
- After three 30-day refills, you must use a CVS Retail or CVS Mail Order Pharmacy

**CVS Retail**
CVS Retail pharmacies include 9,900 stand-alone CVS Pharmacies and CVS pharmacies inside Target.

**When to use:**
- Short-term medications (antibiotics, etc.)
- 30 to 90-day supplies for non-specialty prescriptions
- Maintenance medications (like high blood pressure and diabetes medications) for up to a 90-day supply

**CVS Mail Service Pharmacy**
CVS mail order fills maintenance medications with up to a 90-day supply. You can have medications shipped to your door or pick them up at a nearby CVS Retail pharmacy.

**When to use:**
- Maintenance medications (like high blood pressure and diabetes medications) for up to a 90-day supply

**CVS Specialty**
CVS Specialty is an online service for prescriptions that require additional care and oversight, often to treat complex conditions. You can have medications shipped to your door or pick them up at a nearby CVS Retail pharmacy.

**When to use:**
- Specialty medications (i.e., medications that require special handling, have limited distribution, treat complex conditions and/or require ongoing assessment)
