

Configuring Cisco AnyConnect in Android

PURPOSE:

- Download and Install Cisco AnyConnect
- Configure and Use Cisco AnyConnect

Open the **Google Play Store**, and search for Cisco AnyConnect or Cisco AnyConnect Secure Mobility Client.

Tap **Install**.

Email: help@cu.edu

Upon opening the app for the first time, you will be presented with the End User License Agreement. Scroll to the bottom of the document, then **click OK**.

The application may also ask to send notifications. This will show up as the Cisco icon in the notification tray when the VPN is on.

Then, **enter your CU username and password and Duo Option** into the prompt that follows, and select **System-VPN-MFA** for the group, unless you have a specific application that you are using that needs Full Tunnel, and **press Connect**.

Type one of the Duo Options below in the **Second Password** box. Afterwards it should properly show up as **Duo Option**.

If you do not have Duo set up, please contact the Service Desk.
