

Affordability & Student Financial Aid ^[1]

Even in times of uncertainty, a college education continues to be an investment worth making. On average, people with bachelor's degrees earn \$1.5 million dollars more over their working lives, experience lower unemployment and are healthier than those who do not graduate from college. The following information outlines CU's commitment to affordability, including how we keep tuition in check, continue to fund student aid, reduce out-of-pocket costs, and other factors that affect your investment in your future.

Video: Student Financial Aid

Learn about the value of a college degree, the cost of attendance, how CU funds student financial aid compared to the state and federal government, and the average amount of loan debt CU students have upon graduation.

For questions about student financial aid, please contact the University of Colorado Office of the Vice President of Budget and Finance at system.budget@cu.edu ^[2].

Value of a College Degree

Compared to high school graduates, college graduates earn more than \$1.5 million over their lifetime, experience lower unemployment and better health. Around half of CU bachelor's degree recipients graduate with no debt.

Graduate Lifetime Earnings

On average, college graduates earn \$1.5 million more than those with only a high school diploma.

Unemployment

College graduates experience lower unemployment than those with only a high school diploma.

CU Alumni Earnings

CU graduates find jobs and pay back student loans at a higher rate than others in Colorado and across the U.S. While income varies by field of study, in the first ten years after graduation, average loan repayments are only a fraction of annual earnings.

On average, annual student loan payment is 6% of annual earnings.

Alumni earnings are based on a survey of CU alumni. Average undergraduate loans are based on analysis by the Colorado Department of Higher Education.

Student Loan Default Rates

Students who earn a credential are least likely to default on student loans. At CU, the majority of students repay their loans. In the chart below, CU student loan default rates are compared to Colorado and national averages. CU rates are well below the national average.

Graduation Rates

Graduation rates are a key indicator of how many undergraduate students who start as full-time freshman earn their degrees within four years. Graduating within this timeframe saves money. Students earning 30 or more credits per year will earn their degree within four years.

Student Loan Debt

At CU, Colorado residents earning bachelor's degrees who graduate with debt have between \$25,000 and \$28,000, based on analysis by the Colorado Department of Higher Education. Systemwide, around half of CU graduates have loan debt (rates vary by campus).

Loan Amounts of Bachelor's Degree Recipients in Colorado

Based on this data from the Colorado Department of Higher Education, most college graduates with student loans have debt under \$30,000, a manageable amount given growing income.

Strategic Planning

Pillar 1 **AFFORDABILITY & STUDENT SUCCESS**

Pillar 4 **FISCAL**

CU is committed to being a premier, accessible and transformative public university that provides a quality and affordable education with outstanding teaching, learning, research, service, and health care. Through collaboration, diversity, innovation, technology and entrepreneurship, CU fosters student success and strengthens Colorado's economic foundation.

Our strategic planning process resulted in the creation of four strategic pillars: (1) affordability and student success; (2) discovery and impact; (3) fiscal strength; and (4) diversity, inclusion, equity and access. Each of these pillars has several areas of focus, some of which are campus specific while others are system-wide. This plan will align all elements of governance (regents, system, and campuses), make the case for state support of CU, and shine light on areas of success and need alike.

Tuition & Fees

CU works to identify efficiencies while keeping tuition in check. Tuition for resident undergraduate students has remained flat since FY 2018-19. FY 2020-21 is the third consecutive year of no increase in tuition.

State Funding Impacts on Student Costs

Since FY 2001, state funding of higher education has declined, shifting the burden of the cost of a college education to Colorado families.

Cost of Attendance

Cost of Attendance (COA) refers to all costs of attending college. This includes tuition, fees, room and board, books, transportation, and personal expenses.

Affordability & Student Financial Aid

While students invest in their futures, CU invests in its students to ensure Coloradans can afford a CU education. By keeping tuition in check, eliminating fees, providing financial aid to low income students, and focusing on time-to-degree, CU has increased its focus on affordability.

Types of Student Aid

Systemwide, CU delivered more than \$240 million in grants and scholarships to students. This amount exceeds ALL grants and scholarships from the federal government (including Pell), state, and private scholarships combined.

CU Institutional Aid

Over the past decade, CU's investment in grants and scholarships has doubled. CU awarded more than \$240 million in grants and scholarships in FY 2021. On an average annual basis, CU has increased institutional aid 8.7 percent per year.

Out-of-Pocket Costs

Total out-of-pocket costs are calculated using the Average Cost of Attendance (COA) minus the average aid package (grants+scholarships). Aid packages are the sum of federal, state, institutional, and other scholarships. Data limited to resident undergraduates applying for aid.
