

Get on board with the new eComm tool. ^[1]

September 4, 2014 by [Amy Ventura](#) ^[2]

We are currently identifying the Advancement staff members who will have admin accounts to use this tool to send mass emails. Going forward, there will be a per-user cost for eComm accounts (\$637/user/year). I've reached out to those of you whom I suspect may not need to access the new eComm tool. If you haven't heard from, that means you're slated to have an account to access the new tool.

Please, let me know if you do not need an account in the new eComm tool or if you know of others in your department who will need an account.
