

# **Create Salesforce Campaign and Add Campaign Members**

[1]

May 5, 2026 by [Melanie Jones](#) [2]

eComm specialists are responsible for [creating audiences](#) [3] in Salesforce and Marketing Cloud, which might include Campaigns.

**NOTE** When sending emails, [you should be sending to either reports or data extensions](#) [4]. Sending to a campaign will result in a CAN-SPAM violation. For this reason (among others) eComm specialists are responsible for initially creating Campaigns (instructions below) and converting them to a Report or Data Extension as needed. After that, [users should be able to manage small changes to the Campaign by adding and removing Campaign Members](#) [5].

## **APPLY YOURSELF**

Those tasked with [creating audiences](#) [3] can apply the entire process as practice by cloning the [eComm specialist Training Plan](#) [6] (referenced below).

|

## **Create & Share Campaign**

### **Campaign Naming Conventions**

- **Campaign Name:** 08 UREL 20211010 Invitees
  - 08 = The first two numbers of a report name represent the **campus** on which it was created.
    - 01 = Boulder, 02 = Anschutz, 03 = Denver, 04 = Colorado Springs, 08 = System, 09 = Advancement
  - UREL = The next four letters of your report name represent the **unit** that owns the report, in this case, University Relations. You'll also come across examples like ALUM (for alumni association), HIST (for the department of history), and CHAN (for the Office of the Chancellor).
  - OT/DATE = The next component represents whether your campaign **one-time (OT) or the date you uploaded the information (YYYYMMDD)**.
  - Invitees = The next portion of your report name specifies the **audience**, in this case, invitees to an event.

[Learn more about naming conventions.](#) [7]

## Create Campaign

- Clone
- Create from Scratch

In our Salesforce environment, we already have thousands of Campaigns. For that reason, it is most common for eComm specialists to clone an existing Campaign. Note that a cloned Campaign does not clone the members of that Campaign or the shared settings.

- Navigate to the **Campaign**
  - You could search for the Campaign with the **Global search** at the top
  - You could navigate to the **Campaigns tab** if you recently viewed the Campaign
- Select **Clone** in the top right
  - TIP: You can view the **Sharing** of the original Campaign before cloning it (found to the left of the clone button, in the top right). The cloned Campaign will not inherit this sharing, so you'll need to do it manually after the Campaign is cloned (if relevant).

## ▾ Campaign Details

Contacts in Campaign 21

- Modify the Name and Description of the Campaign
- The cloned Campaign will inherit most values from the original Campaign.
  - The following fields must be updated or confirmed to be accurate:
    - **Name**
    - **Description**
    - **Type** - should be *Email* or *Subscription*
    - **Active** - must be checked
  - The following fields are not required, but can be populated:
    - **Parent Campaign**
    - **Status**
    - **Start Date**
    - **End Date**
    - **Do Not Delete**: this is a new field as of May 2026
      - Per eComm data retention practices [8], Campaigns that have not been created or changed (having Campaign Members added or removed)

within 2 years will be removed from Salesforce. Generally, Campaigns that have not been modified in 2 years are no longer used. Check this box if there will be no changes to this Campaign for an extended period, but it is still in use. Campaigns with the Do Not Delete box checked will not be removed from Salesforce, regardless of when they were last modified.

- Click the blue **Save** button in the bottom right

Campaign

Type

- Select **Campaign** in the top navigation
- Click **New** in the top right corner

The screenshot shows a web application interface. At the top, there is a blue cloud logo on the left and a search bar on the right. Below the logo is a navigation menu with items: 'eComm', 'Home', 'Chatter', 'Reports', and 'Campaigns'. The 'Campaigns' item is highlighted with a green box. Below the navigation bar, there is a section titled 'Campaigns' with a target icon and the text 'Recently Viewed'. Below this, it says '44 items • Updated a few seconds ago'. A table follows with two columns: 'Campaign Name' and 'Campaign ID'. The first two rows of the table are:

	Campaign Name	Campaign ID
1	08_UIS_20210615_MJJ Test	7015G00
2	08 SSC OT SSC Members & Leadership	7015G00

- Generic Campaign is set by default.
- Slect the blue Next button in the bottom right

## Share Campaign

**SHARE CAMPAIGN** Don't forget to share the Campaign with the Public Group or Individual User so they have access. Failure to do so will likely result in a failed send.

There are two ways to share a Campaign:

- Share Campaign (new)
- Share Campaign (old)
  
- Once a Campaign exists, click the **Sharing** button in the top right

The screenshot shows a campaign management interface. At the top, there is a header for the campaign: "Campaign 08 ECOMM 20220531 Current Users" with a sharing icon. Below this is a table with the following columns: Type, Status, Start Date, and End Date. The table contains one row with Type "Email" and Status "Planned". Below the table, there is a "Details" section with two fields: "Campaign Name" (08 ECOMM 20220531 Current Users) and "Parent Campaign".

- In the pop-up, it defaults to Users. **Click the down arrow** with the image of a person to select **Public Groups** in the dropdown.

### Manage Campaign Members

When a list is provided, there is no telling the quality of the data provided. Lists require varying amounts of 'cleanup' [9] that is best done before processing the list. Failure to 'cleanup' a list can cause technical issues when adding Campaigns Members in bulk with Apsona and/or make the process more fragmented and cumbersome for you.

### Manage Campaign Members Individually

eComm specialists can add & remove Campaign Members individually [5]. Users can also add and remove Campaign Members and should be encouraged to do so. It's a great way to empower users to manage their audience after being created initially.

- *Walk through a test scenario (**Campaign 1**) by following along with the video above (0:00-1:55). Do not be shy about adding random folks to this Campaign and removing them to practice.*

## Add Campaign Members in Bulk

It's most common for eComm specialists to add Campaign Members in bulk via Apsona [10].

- *Walk through a test scenario of matching on a single data point (**Campaign 2**) by following along with the video above (1:56-6:55). Complete the same process for the remaining tabs (**Campaign 3-7**).*
- *Walk through a test scenario of matching on numerous data points (**Campaign 8**) by following along with the video above (6:56-13:39). Then complete the same process for the remaining tab (**Campaign 9**).*

## Add New Contacts

Unable to find a contact in Salesforce to add to a Campaign? When this occurs, the Contact needs to be created first. eComm specialist can create new contacts in bulk with an upload process via Apsona [11] or individually with the same process users leverage [5]. Once the Contact(s) exists, use Apsona to add the Campaign Members to the Campaign (above).

- *Walk through a test scenario (**Campaign 10**) by following along with the video above (13:40-19:41). Then complete the same process for the remaining tab (**Campaign 11**).*

## Recorded Sessions

The following session took place in Nov. 2023 as a refresher for existing eComm specialists.

|

**TEST YOURSELF** eComm specialists and other audience creators - regardless of their previous experience - are highly encouraged to complete an extensive quiz to ensure a deep understanding of Campaigns / Campaign Members / Apsona annually. Please set aside 30-60 min. to complete the quiz of 35+ questions [12], many being open-ended. Do not miss the opportunity to review correct responses after submitting your answers to see how they match up for self-correction.
