

Cvent | Paid Event ^[1]

July 28, 2025 by [Melanie Jones](#) ^[2]

Managing monies for events can get complex, although we intend to shield event planners from the madness. By centralizing finances, we can bring efficiency to CU while maintaining our registrants' security. Expand the 'Paid Event Configuration | Event Planner Experience' section below for details on features that are technically available in Cvent but cannot be used at CU, as doing so would violate policy.

With eComm, a Cvent event can be configured to collect money for an event that will later be deposited into your speedtype. All Cvent users must complete the Payment Card Industry (PCI) SkillSoft course annually and understand the details below.

Event Title Requirement

As of Dec. 2023, special characters CAN be used in the event title. Previously, credit card payments for event titles that contained special characters would not reconcile correctly with Authorize.net and Wells Fargo, leading to failed payments, delayed payments, and problems in issuing refunds. This is no longer the case.

Overview & Service Fees

Money is collected through a single Internet Merchant Account (IMA) in Cvent (CU Cvent) and then sent through Authorize.net (for fraud detection) before landing in a single Wells Fargo Account. The CU System Treasury Office then allocates money from the larger account back to individual Speedtypes each month.

Service Fees

The monthly Wells Fargo fees are approximately 2.75% of the monthly transaction total. The fees allocated to each speedtype are based on the volume of the event as a percent of the total that Wells Fargo charges CU Treasury. In addition, AMEX also charges 2.25% of its total volume, which the Treasury allocates similarly. Since the Cvent cardholders who use AMEX are fairly small, the speedtype charges per month have been \$5.00 or less per month, per speedtype. These rates vary each month, depending on credit card vs debit card usage.

For more information, contact [Alisha Palas](#) ^[3] in the Office of the Treasurer.

Paid Event Configuration | Event Planner Experience

To start, you'll need to ask your eComm Specialist to get your unit's speedtype and account code added to Cvent. That way, you can set up your event's custom fields with your unit's financial details so the money collected can be deposited from a general CU account to your speedtype. Once your financial information is available in Cvent, you'll need to configure a few items within the event to make collecting payments possible [4].

Configure Event to Collect Payment [4]

- Encourage registration by offering early bird pricing, a discount code, or volume discounts [5].
- Not familiar with speedtypes & account codes? Learn how eComm leverages them [6].
- You can allow Paying Online After Registration [7]. This option does not allow registrants to skip the payment section of their initial registration, but will provide an opportunity for the registrant to resubmit payment if their original payment failed or switch their payment type if they originally planned to pay by check and now want to pay online with a credit card.

Never Enable Optional Donations

Only designated Cvent fundraising event forms are permitted to collect optional donations. Event planners hosting non-fundraising events who want to encourage optional donations from event registrants should provide a link to the associated fund page on the CU Foundation giving site [8].

Never Process Payment at a Later Time or Allow Partial Payments

'Process payment at a later time' [9] and 'allow partial payments' [10] should never be enabled to adhere to CU's standards for protecting cardholder information. There is no exception.

Funds collected through Cvent are deposited into the speedtype account the following month, typically around the middle of the month. For instance, if someone registers and pays on April 17, the deposit will occur in mid-May. However, if the payment is made near the end of the month—such as on April 30—the deposit will be delayed until mid-June.

Your service fees will be managed through a separate deduction from your speed.

Event Launched with Incorrect Speedtype and/or Account Code

While the money isn't gone, it creates confusion (and inefficiency) for our partners in treasury. Please double-check your speedtype and account code before requesting approval from your eComm Specialist. If you're unsure, contact your finance office to confirm accuracy before launching the event.

If money gets deposited into the wrong speedtype or account code, Treasury cannot correct it. Instead, move the money to the desired account yourself.

Refunds

Managing money is hard enough without having to worry about giving it back. By creating a refund policy ^[11], registrants who made an online payment will automatically get a refund when their registration is canceled, saving you an extra step. If you forgot to set up the refund policy in advance, you can manually give a refund ^[12]. Refunds are flexible enough to be given in full, partial, or tiered, based on when the cancellation notice was given.

Once a refund is processed in Cvent, the journal entry might take up to 8 weeks to be reflected in your account.

- **Refunds can NOT occur on the same day as the transaction**
 - Due to how these transactions are reconciled, a refund cannot take place on the same day as the transaction.
 - If an automatic refund policy is set up and a registrant cancels their registration on the same day, Cvent will not process the refund. A Cvent user will need to manually initiate the refund the following day.
- **Refunds must NOT Exceed 120 days**
 - CU's payment gateway is Authorize.Net which does NOT allow a refund to process beyond 120 days post-initial payment. If you try to refund an initial payment made by an invitee that took place more than 120 days ago, the transaction will fail.
 - Talk to your department's finance staff to settle the refund outside of Cvent by cutting the registrant a check from the speedtype. It will likely involve going through the non-employee reimbursement process ^[13]. It typically takes 10 business days from the time of submission for the refund to be processed.
- **Refunds will fail if the original payment method has been canceled or expired**
 - ?The Event Planner will need to submit a non-employee reimbursement report ^[13] to cut the registrant a check from the speedtype. It typically takes 10 business days from the time of submission for the refund to be processed.

Event Website & Emails | Registrant Experience

It's a best practice to be clear with registrants regarding pricing and options for refunds before registration begins and beyond. Here's how we approach financial transparency to minimize confusion:

Clear Messaging

- **Pre-Registration**
 - Highlight pricing details on your Marketing Cloud invitation and Cvent website.
- **During Registration**
 - Include your refund policy (or no refund policy) on the Cvent website and throughout the registration process.
- **Post-Registration**
 - Display the amount charged in the registration confirmation email along with the name that will display on their bank statement charge: UNIV OF COLORADO EVENTS
 - Add a refund policy to the relevant post-registration emails with a link to modify registration (include the Registration ID)

NOTE Charges & refunds for all events will appear on a bank statement as: UNIV OF COLORADO EVENTS

Refunds

Once processed in Cvent, the refund should appear in their account statement in 3-5 business days.

- **Refunds can NOT occur on the same day as the transaction**
 - Due to how these transactions are reconciled, a refund cannot take place on the same day as the transaction.
- **Refunds must NOT Exceed 120 days**
 - CU's payment gateway is Authorize.Net which does NOT allow a refund to process beyond 120 days post-initial payment. If you try to refund an initial payment made by an invitee that took place more than 120 days ago, the transaction will fail.
 - Talk to your department's finance staff to settle the refund outside of Cvent by cutting the registrant a check from the speedtype. It will likely involve going through the non-employee reimbursement process ^[13]. It typically takes 10 business days from the time of submission for the refund to be processed.

International Registrants

CU Limitations

Credit Cards with an international address not going through? Ask Treasury to accept international transactions as the individual registers.

On rare occasions, transactions can fail due to too many characters in the international

address. Our treasury team can temporarily lift the Address Verification filter so the transaction can be processed successfully. Contact [Alisha Palas](#) ^[3] in the Office of the Treasurer at coordinate.

Accepted Credit Cards & Currencies

With eComm's Cvent transactions sent through Authorize.net, registrants can pay with **Discover, Visa, Mastercard, or American Express**. All charges must be in **USD**.
