eComm Help Ticket [1]

August 26, 2024 by melanie.jones@cu.edu [2]

The eComm Help Ticket is a robust resource designed specifically for eComm and is constantly updated. Check out an overview of the process (including a peek of the back end), benefits to those requesting help and those providing support, plus common missteps to avoid.

The help ticket compliments the eComm wiki index [3], which has a tab devoted to each application within eComm's suite of tools.

The video above reviews a slide deck [4] in greater detail. Feel free to share either resource to encourage tickets to be submitted for all help requests.
