

eComm Upgrade: Marketing Cloud Migration Phase One of Three Complete ^[1]

December 19, 2018 by [jennifer.mortensen](#) ^[2]

On Wednesday, December 19, 2018, the System eComm team completed work on phase one of three of the Marketing Cloud content migration. Phase one consisted of creating a migration folder in each Marketing Cloud business unit (in both Content Builder and Classic Content) that will be used to migrate content to the new e-Comm specific environment.

Reminder

Marketing Cloud users should not delete or modify the z_migration folder.

Phase two of the migration will begin on January 22, 2019.

Additional information can be found on our [eComm blog](#) ^[3].
