Manage Campaign Members [1]

March 4, 2026 by Melanie Jones [2]

Does a contact need to start (or stop) receiving a communication of yours?

1. ***If your Report or Data Extension is based on a Salesforce Campaign***, users can manage Campaign Members and create new Contacts when needed.
2. Those audience changes will be reflected the next time the corresponding Report is sent to or Data Extension is started.

It's a great way for users to continually manage small changes to an audience, without involving an eComm specialist.

NOTE When sending your email, you should be sending to either reports or data extensions [3]. Sending to a campaign will result in a CAN-SPAM violation. For this reason (among others) eComm specialists are responsible for initially creating Campaigns [4] and converting them to a Report or Data Extension as needed.

Find Campaign

Managing Campaign Members is easy, once you figure out what Campaign is linked to your Report/Data Extension. For some this will be straightforward and others more convoluted - either way there are tricks to find the correct Salesforce Campaign. Your eComm specialist can also provide these details to you.

Salesforce Campaigns are always converted to Salesforce Reports and then may or may not be created in Marketing Cloud as a Data Extension, which can make finding the correct Campaign more difficult. There are numerous ways to find your Salesforce Campaign.

You may be able to easily find the Campaigns associated to the Report/Data Extension you use with a quick search in Salesforce. It could be clear as day which Campaign you should use, but if there is any confusion it is worth going through the steps below to 'back into the answer' by looking at the Report/Data Extension.

- 0:00 | View All Campaigns
- 0:40 | Search
- 1:12 | Use Report/Data Extension to find Campaign ID

Data Extension

- Open the Data Extension (Marketing Cloud >> Email Studio >> Import >> select name) to find the Report name and/or Report ID.

Report

Open Report (two options)

- Login into Salesforce >> Open any Report >> Paste Report ID from above in the URL (similiar character section) or use URL below
  - https://cuecomm.lightning.force.com/lightning/r/Report/ [5]**PLACE ID HERE**/view

Report Filters

- Find a filter with 'Campaign ID' or 'Campaign Name' in the Report*

*If this line doesn't exist in your Report, it's not based on a Campaign and therefore you cannot add/remove Campaign Members. You can however ask your eComm specialist for a Report based on a Campaign so you can make small audience changes. You would send emails to two Reports/Data Extensions .

Campaign

- Replace the Campaign ID into the existing URL (similiar character section) or use URL below
    - https://cuecomm.lightning.force.com/lightning/r/Campaign/ [6]**PLACE ID HERE**/view

Add Campaign Members

Add from Contact

- Contacts Related List
- Global Search

- **Search** the name in the top, Global Search
- **Click the Contact's Name**
    - *Oftentimes, numerous Contacts are presented. You may need to open numerous*

Contacts and view their information to confirm it's the right person.

- Navigate to the **Related** tab
- Hover **Campaign History**
- The Campaign History pop-up will appear. Click the **Add to Campaign** button

Add New Contacts

Unable to find a contact in Salesforce to add to a Campaign? When this occurs, the Contact needs to be created first.

Process

- Fill out the details within the blue box below, and when you 'Create New Contact', this page will refresh. Alternatively, you can create new contacts via this link: https://cu.tfaforms.net/244 [7]
- You can then find them in Salesforce and add them as a Campaign Member to your particular Campaign with the instructions above. *It could take up to 2 minutes for the new Contact to appear in Salesforce.*

Tips

- **Provide a real First Name and Last Name** when possible; otherwise, leave the pre-populated text where First Name is *Friend* and Last Name is *of CU*
- New contacts should **not** have an email with a university domain (@colorado.edu, @cuanschutz.edu, @ucdenver.edu, @uccs.edu, @cu.edu, @cufund.org, etc). Contacts with a good email containing a university domain should already exist in Salesforce.
  - The ONLY exception to this rule is if you are adding a group/shared inbox rather than an individual (eg: parking@colorado.edu [8]). Group/shared inboxes do not automatically exist in eComm Salesforce.

First Name

Friend

Last Name

of CU

Email Address

Person Submitting New Contact (First and Last Name)

Create New Contact

Note

- If the email address is new to Salesforce, a new Contact will be created.
- If the email address already exists in Salesforce, a new Contact will NOT be created.

NEVER create a new Contact directly in Salesforce. These incorrectly created Contacts will automatically be deleted, undoing your work. Instead, follow the instructions above.
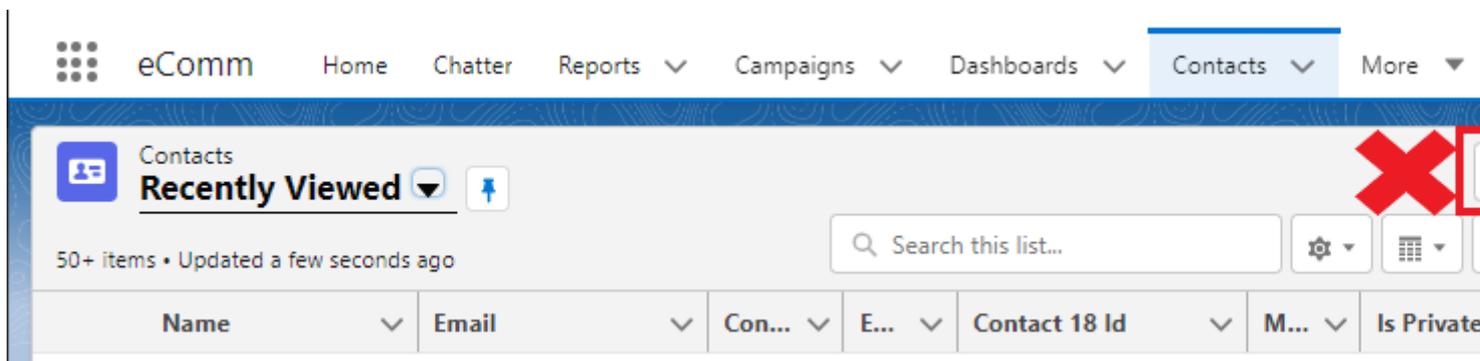

Frequently Asked Questions

I can't find an email in eComm Salesforce with an internal domain. Why can't I add them?

- Creating a new contact that has an internal domain will make a duplicate, since students and employees with internal domains already exist. If you are unable to find their email, it's likely incorrect. Search for the contact based on other information (like First Name and Last name) to find them, and use the email address on file (which is better, more accurate information).
  - Duplicate contacts are problematic because they create additional work to clean up, make it difficult to find the right contact, and potentially lead to CAN-SPAM violations.

Can I create my own audiences from scratch?

- No. New audiences will still need to be created by an eComm specialist with their

turnaround times in mind. This is to ensure audience accuracy, including adhering to CAN-SPAM.

I can't find the Campaign my eComm specialist made, that is linked to my Report/Data Extension. Should I make a new one?

- No. A new Campaign is considered a new audience. See above.

Can I make mass changes to a Campaign?

- No. Mass changes to an existing Campaign will still need to be completed by an eComm specialist. The processes available to users are good for small changes (less than 20), but would be cumbersome for mass changes.

Can I update Reports that are not based on a Campaign?

- No. Any updates to a Report will need to be made by an eComm specialist.
- No, but you could ask your eComm specialist for a Report based on a Campaign so you can make small audience changes. You would send emails to two Reports/Data Extensions .
