Preferred Name Rollout for eComm Specialists [1]

August 11, 2022 by Melanie Jones [2]

After ensuring that preferred name personalization is possible [3] given your population, Reports and Data Extensions need to be created (or updated) by an eComm specialist to contain the appropriate preferred name field in Salesforce.

Reports

Based on the population you are reporting [4] on, you'll need to use the respective preferred name field. For example, use:

- 'Student Preferred Name' from Campus Solutions (CS) for students.
- 'Employee Preferred Name' from Human Capital Management (HCM) for employees.
- 'Alumni/Donor Preferred Name' which comes from Advance/Ascend for alumni and donors.

<table>
<thead>
<tr>
<th>Student Preferred Name</th>
<th>Employee Preferred Name</th>
<th>Alumni/Donor Preferred Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>Miles</td>
<td>Robert</td>
<td>Miles</td>
</tr>
<tr>
<td>Robb</td>
<td>Robert</td>
<td>Robert</td>
</tr>
<tr>
<td>Rudy</td>
<td>Robert</td>
<td>Robert</td>
</tr>
<tr>
<td>Sebastian</td>
<td>Robert</td>
<td>Robert</td>
</tr>
<tr>
<td>Rob</td>
<td>Robert</td>
<td>Robert</td>
</tr>
</tbody>
</table>

NOTE Prior to Sept. 11, 2022 the 'First Name' field can be used reliably for personalizing student communication. Beginning on Sept. 12, the 'First Name' field should be replaced by ‘Student Preferred Name’. The ‘First Name’ field's logic and label will be updated to 'Legal First Name', which is not encouraged for personalization but can be seen in Salesforce when viewing a Contact.

NOTE All three of these preferred names live on the Contact object in Salesforce. They can all be pulled into Reports but cannot be viewed on the Contact.
Data Extensions

For personalization to work, the field being used must exist in the Data Extension. You can update existing Data Extensions or create new ones (and delete old ones).

- Update Data Extension
- Create New Data Extension

A Data Extension that already exists can be modified to remove the existing *First Name* field and add the new *Preferred Name* field. To do so:

- Hover **Subscribers** and select **Salesforce Data Extensions** in the dropdown. Open your Data Extension by clicking on the name.

### Delete Existing Data

If the Data Extension contains data, you'll need to delete the records before adding new fields.

- Navigate to the **Records tab** and select the blue **Clear Data** button. Click **OK** in the pop-up to confirm this action.
Add & Remove Fields

- Go back to the first Properties tab. Select Edit Fields.
Click the minus icon to remove the First Name field
To add a field, select the Plus icon.
Add the new Preferred Name field exactly as it is labeled in Salesforce.
- ‘Student Preferred Name’ for students.
- ‘Employee Preferred Name’ for employees.
- ‘Alumni_Donor Preferred Name’ for alumni and donors.

Click Save Fields.
IMPORTANT  Incorrectly named fields will not match correctly, resulting in a Data Extension failing to run.

Create New Data Extension [5]

The same preferred name used in the Report should be included in the Data Extension to make personalizing possible.
Delete Previous Data Extension [8]
