

Send Marketing Cloud Emails ^[1]

January 1, 2023 by [Melanie Jones](#) ^[2]

There are two ways to send emails through Marketing Cloud, Guided Send and Salesforce Send Emails. Guided Send has a sleeker interface but Salesforce Send Emails can be reused bringing efficiency and minimizing room for error.

GUIDED SEND

1 | Guided Send

Guided Send has a sleek interface and is the most intuitive sending method. New users are encouraged to leverage this route as they learn Marketing Cloud initially.

[Guided Send Checklist | 2-Page Quick How-To](#) ^[3]

2 | Salesforce Send Emails

Salesforce Send Emails are the original method of sending emails, without the sleek interface. This method opens the door for efficiency and minimizes room for error. Users are encouraged to adapt to this method of sending as soon as possible.

- Create New
- Re-Use (recommended)

Navigate to Salesforce Send Emails

1. Hover **Email Studio** in the top left of the navigation >> click **Email** in the dropdown
2. Hover **Interactions** in the top navigation>> Select **Salesforce Send Emails** >> Click the **Create** button

Create a Salesforce Send Email

Properties

1. Select the Create button at the top
 - o **Name** | Provide your email with a descriptive name - this will only be seen by you.
 - o **Message** | Select the message content you want to deliver
 - o **Subject Line & Preheader** | Confirm you are happy with these two elements

From Information or Send Management

1. **Send Classification** | A combination of the Sender Profile and Delivery Profile.
 - o **Sender Profile** | The friendly name and email address your message comes from. This can be overwritten from what is automatically selected by the Send Classification.
 - o **Delivery Profile Email** | Commercial emails use CU FOOTER FOR ALL EMAILS. Those with Transactional send needs will have an alternative Delivery Profile (and Send Classification).

Select Recipients -

1. Targeted

1. Your audience might be a Salesforce Report(s) or a Salesforce Data Extension(s). You will NEVER include a Campaign.
2. You cannot combine Reports with Data Extensions.
3. Read the name carefully. View your report(s) in Salesforce to see a full audience description.

2. Excluded (optional) | Audiences can be excluded from a send (based on Subscriber ID).

1. If the Targeted audience includes Data Extensions, Data Extensions can be Excluded.
 2. If the Targeted audience includes Reports, Reports and/or Campaigns can be Excluded.
3. Select **Save** to confirm the audience(s) you selected

Print Salesforce Send Tutorial [4]

For many Marketing Cloud users, sends are recurring meaning the email content will change, but other elements such as the audience, from information, tracking folder destination, and more remain the same. Re-using a send is efficient and minimizes room for error compared to a send created from scratch. Good candidates for re-using a send include a newsletter (any frequency), event invitations, updates/alerts, and more. Once identified review all the email

details to confirm the accuracy of the previous send, then:

1. **Rename the send**
2. **Select the new email content** (after being finalized).
3. Review the audiences. **If Data Extensions, successfully re-run them before sending the email.**
4. **Send/schedule Email**

Convert Previous Guided Send to Salesforce Send Email

- Rather than creating a Salesforce Send Email from scratch, use a Guided Send from before.
- Rename the send to something you and your team understand, rather than the random combination of characters it originally got.

3 & 4 | Automation Studio & Journey Builder

Automation Studio is a more robust function that can be used to execute a defined task, either manually or automatically on a regular cadence. Most often it's used to run Data Extensions in combination with Salesforce Send Emails. This advanced option is supported by an eComm specialist, only in cases that make sense.

- [Scheduling Data Extension Imports in Automation Studio](#) ^[5]

- [Organizing Your Work for Ongoing Automation Studio Sends](#) ^[7]

If you have a series of emails that you've been able to send, it might be a good candidate for a Journey. Journeys require ample planning, finalized content well in advance, and a solid technical understanding to be successful.

- [Journey Builder](#) ^[8]

PROS

CONS

SALESFORCE SEND EMAILS

- Reuse a previous send to reduce the need to configure all send components at every send (*efficient and less risk for error*)
- Name the email send as desired (*valuable for reporting & troubleshooting*)
- Stay organized by placing email sends in folders

- Less modern interface

GUIDED SEND

- Send via an intuitive, step-by-step wizard which is easily navigated to while creating an email

- Must configure send components for every send (*inefficient & increased room for error*)
- Randomly named email send (*difficult to troubleshoot and creates reporting limitation*)
