Coming soon: HCM fields with sensitive data to be masked [1]

May 29, 2025 by Employee Services [2]

The University of Colorado will enable delivered data masking functionality within HCM for some fields containing sensitive data, beginning in early June.

HCM users with the CU HCM User Inquiry role who do not have higher-level user roles will have some fields fully or partially masked because of this change, including the National ID field.

Users affected by this change who have a valid business reason to see full, unmasked access to data should contact their campus security coordinators and provide details on their business needs for this access.

Contact information for campus security coordinators can be found at Campus Access Coordinators [3].
