

Fix implemented for POI processes ^[1]

May 4, 2018 by [Employee Services](#) ^[2]

An HCM fix was implemented to address an issue of orphaned records when **Business Unit (campus)** and **Department** fields were not completed while creating/maintaining a Person of Interest (POI) or adding a POI relationship.

Note: Click any image to enlarge it.

What does this fix change?

Previously, users were required to click the **Get Enabled Security Types** button and select the Business Unit, Department and Set ID. There were no warning or error messages if this was not completed.

The screenshot shows the 'Add a POI Relationship' form. At the top, there are buttons for 'Add Person of Interest' and 'CU POI Sponsor'. Below these is the title 'Add a POI Relationship'. The form is divided into several sections. The 'Person ID' field is at the top right. Below it, there are tabs for 'Person of Interest Type' and 'Other'. The 'Last Updated By' and 'Last Update' (05/01/18 9:29:53AM) are also visible. The 'Security Data' section is highlighted. It contains a table with columns: '*Effective Date' (05/01/2018), 'Get Enabled Security Types' button, 'Security Access Type', 'Enabled', 'Value 1', and 'Value 2'. The 'Security Access Type' column has dropdowns for 'BUSINESS UNIT' and 'DEPARTMENT'. The 'Value 1' column has a search field with 'UCOLO' entered. The 'Value 2' column has a search field. Below the 'Security Data' section is the 'Person of Interest History' section, which contains a table with columns: '*Effective Date', '*Status', '*Planned Exit', and 'Comments'. The first row shows a record with an effective date of 05/01/2018, status 'A', and planned exit of 05/01/2019. At the bottom of the form are 'OK', 'Cancel', and 'Apply' buttons.

[3]

With this fix in place, users do not need to click the Get Enabled Security Types button. The Business Unit and Department fields will now be visible on the page. Users will just enter or select the appropriate values needed for the POI.

The **Set ID** will be pre-populated with **UCOLO**, and **Business Unit** and **Department** are now

required fields. Users will not be able to leave the page without filling out these fields. A warning message will display if they attempt to move on without populating Business Unit and Department fields, as seen below.
