

## **Jobs at CU Update: Data feeds under construction** <sup>[1]</sup>

July 1, 2013 by [Employee and Information Services](#) <sup>[2]</sup>

Employee Services and campus Human Resources offices are continuing to work on interfaces that will allow data to flow between JobsatCU (PeopleAdmin) and HRMS.

At present, the correct data is not yet available for the feeds to work on a daily basis. Also, the data in the Hiring Proposal (in JobsatCU) is not as clean as hoped. As a result, work is under way to create required fields on the Hiring Proposal.

Progress continues, but the feeds were not functional by the end of June. At this time, only the new positions are feeding nightly from JobsatCU to HRMS. Employee Services is hopeful the rest will start soon and will update users as these new features are functional.
