

New portal, HCM tools enable employees to select gender identity ^[1]

October 23, 2024 by [Employee Services](#) ^[2]

Starting Nov. 8, a new employee portal feature will allow employees to self-select their gender identity from 12 options. Releasing this self-service tool enables employees to select an accurate gender identity and allows CU to better reflect campus demographics.

CU was able to add these features after Oracle PeopleSoft, the university's HR software vendor, made the gender identity features available to customers worldwide. While employees may self-select their gender identity, it will not be added to queries or reports available to HCM users in the HCM User WorkCenter.

Updating gender identity and legal sex

Employees can select their gender identity from 12 gender identity categories:

- Agender
- Bigender
- Gender expansive
- Genderfluid
- Man
- Non-Binary
- Prefer not to say
- Prefer to self-describe
- Third Gender
- Two Spirit
- Woman

HCM will also support the additional sex designation of U/X (U), which represents "unspecified or another gender identity," in addition to Female (F) and Male (M). This effort aligns with federal and state government efforts to expand access to accurate ID documents and documentation.

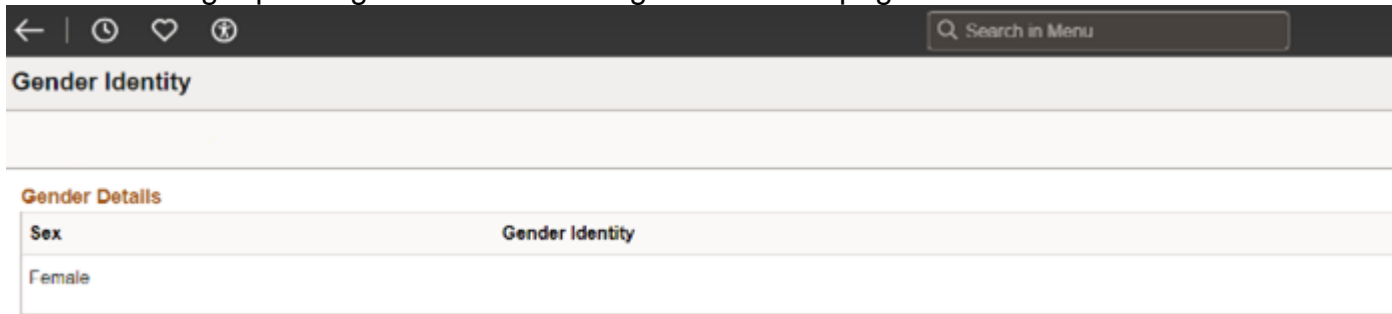

To change legal sex (F, M or U), employees must contact their department or campus HR office and provide documentation with a passport or driver's license. Please note: Any legal sex change entries should not be backdated before Jan. 1, 2024, to prevent HCM issues

related to benefits.

How to update gender identity

1. Log in to the [employee portal](#) [8].
2. In the CU Resources area, click the dropdown menu on the top left of the page, and select **My Info and Pay**.
3. Click on the **Gender Identity** tile.
4. The landing page will show an employee's current information — their sex, gender identity and status. As the gender identity feature is new, this item will be blank when they first log in.
5. Click on the right-pointing arrow on the far-right side of the page.

The screenshot shows the 'Gender Identity' page in the employee portal. At the top, there is a navigation bar with a search bar labeled 'Search in Menu'. Below the navigation bar, the page title 'Gender Identity' is displayed. The main content area is titled 'Gender Details' and contains a table with two columns: 'Sex' and 'Gender Identity'. The 'Sex' column shows 'Female' and the 'Gender Identity' column is currently blank.

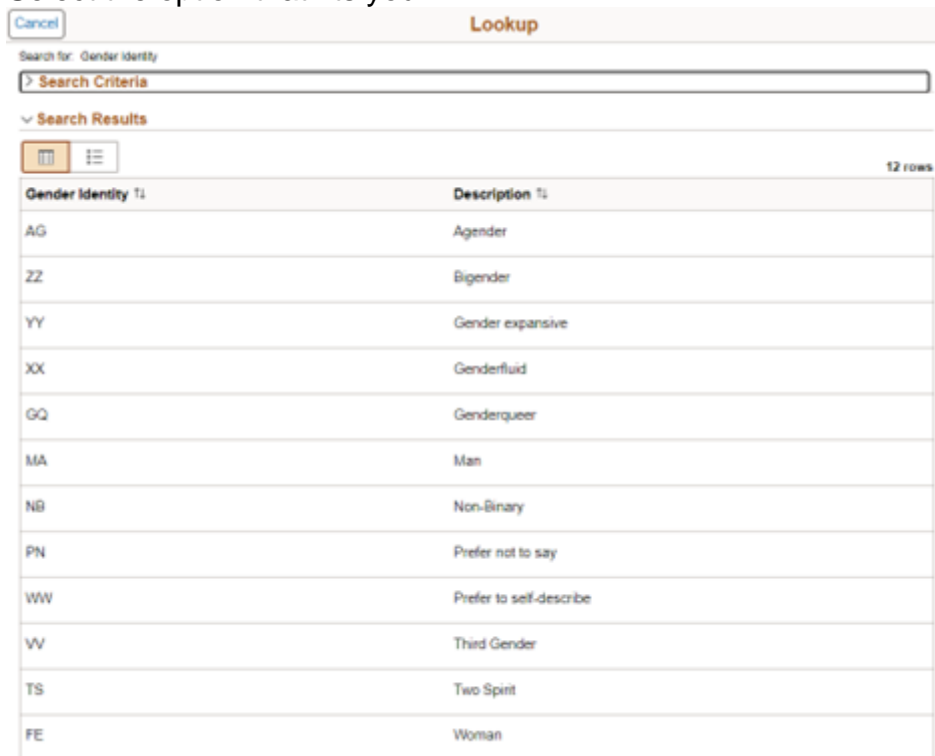

6. A Gender Details window will appear. Click the **magnifying glass** to see a list of gender identity values.

The screenshot shows a 'Gender Details' window that appears when clicking the magnifying glass icon in the previous screenshot. The window has a title bar with 'Cancel' and 'Save' buttons. The main content area is titled 'Gender Details' and contains a message: 'To change the Sex field value, please contact your department HR office and supporting documentation is required. Selecting a Gender Identity value is optional and does not require you to contact your department HR office.' Below the message, there are fields for 'Change As Of' (10/14/2024), 'Region' (United States), and 'Sex' (Female). At the bottom, there is a 'Gender Identity' field with a magnifying glass icon and a blue dot icon next to it, which is highlighted by a red box.

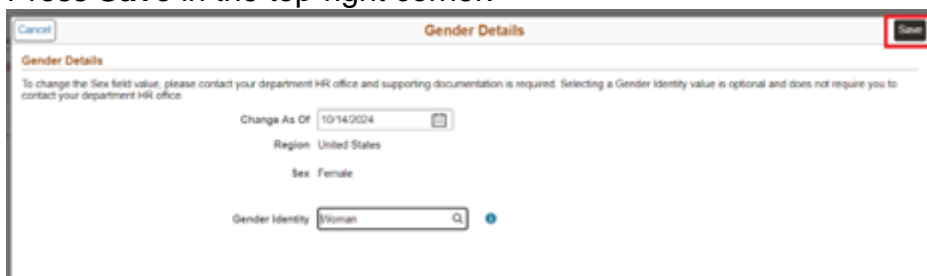

- 7.

Select the option that fits you.

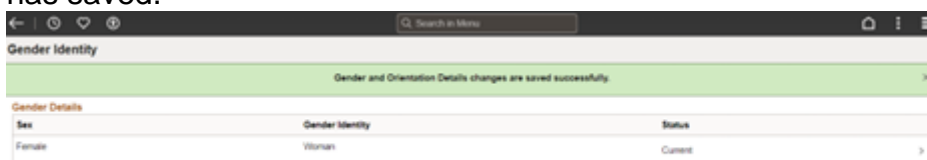

Gender Identity	Description
AG	Agender
ZZ	Bigender
YY	Gender expansive
XX	Genderfluid
GQ	Genderqueer
MA	Man
NB	Non-Binary
PN	Prefer not to say
WW	Prefer to self-describe
VV	Third Gender
TS	Two Spirit
FE	Woman

8. Press **Save** in the top-right corner.

9. The user will see a green ribbon on the gender identity page confirming their change has saved.

Sex	Gender Identity	Status
Female	Woman	Current

Sex, gender identity data confidentiality

The security of employees' personal data is of the highest priority, and the new HCM sex and gender identity fields are no exception. Both are classified as Highly Confidential under CU's data governance rules [9].

This information can be viewed by employees who have related HCM access, who must adhere to university data confidentiality rules. Most department HR roles can only see data for employees within their own department. Some HR and IT offices can view data for all campus employees.

Employee gender identity information will not be made available in university systems outside HCM. Data will be aggregated for any federal reports, with no personally identifiable

information.

While the sex data field is shared with insurance vendors as required by their health plan coverage. For vendors that require a binary code, U/X will be omitted or converted to M, depending on the rules governing specific reports.
