See how Transfer processes will change after April 14 upgrade

April 10, 2018 by Employee Services

HCM upgrades arrive on April 14. Catch up on Transfer navigational and process changes, then watch recorded webinars to learn more.

The following cycle will be described in detail below:

Before beginning: Collect information

Before beginning a Transfer, users will need the employee's Employee ID number, an Effective Date, the Position Number for the position the employee is transferring into and information about whether the position will be funded with a new contract.

After this information is collected, the Job List query (CUES_HCM_JOB_LIST) will need to be run by following this path from the HCM Community Users dashboard: HCM WorkCenter tile > Resources tab. Select the Click here for ALL link if the query does not appear in the list of most used.

The position the employee is transferring into must be prepared by ensuring the correct funding is specified and all position updates are made. This may include changes to Location, Standard Hours, FLSA, etc. Helpful hint: If the transaction is for a position with a new contract, verify the employee is not on a current contract by navigating to Non-Pay Actions > Job Information > Job Data > Search and select employee. From the Compensation tab, check that the Frequency is C for contract. BASEC will have been populated as the Rate Code.
Begin the transaction

Users will create a Transfer using a Template Based [4] Transaction (TBT) [4]. The TBT can be accessed by navigating to the HCM Community Users dashboard, clicking the Pay Actions tile and selecting Template Based Transactions.

If the Transfer is not on a new contract, CU_XFR should be typed in the Select Template field. If the Transfer has a new contract, type CU_CNTRCT_XFR. Helpful hint: The magnifying glass can also be used to search for and select the template.

Enter transaction details

Users will be required to enter the following information:

1. **Employee ID.** Helpful hint: Pressing tab after entering the Employee ID will populate the employee’s name to the right of the field with a related content indicator displayed. Right clicking the indicator and selecting CU Person Organizational Summary will ensure this is the correct employee for the Transfer.
2. Select the record from the Employment Record Number list.
3. The **Effective Date** of the Transfer transaction. Helpful hint: For contracts, this date determines users’ choices when they reach the Select Contract Term Period field. To access a set contract code in the contract crosswalk table, the effective date entered here must match the effective date of the contract type that is to be selected.
4. **A Reason Code:**
   - Temporary to Permanent
   - To Another Department
   - To Classified Staff
   - To Faculty
   - To Student
   - To Temporary Staff
   - To University Staff
   - Transfer
   - Transfer to Another Campus
Entering transaction information for Position and Job

Next, users will need to enter their Transfer details. This procedure differs slightly between transactions with and without a new contract. Both processes are outlined below:

**Process for a Transfer without a new contract**

1. For both Transfers with and without a new contract, enter the **Position Number**. **Helpful hint:** To verify the details of the position, users will be able to select **Related Content** from the top right or **position funding** or run the **Manage Transaction** query.
2. The Pay Group will already be selected. Users can update this field if necessary.
3. Type or search for the Employee Type.
4. Type or search for the Compensation Frequency.
5. Type or search for Comp Rate Code, Compensation Rate and Compensation Frequency field values. Helpful hint: Users have the option to enter additional pay components under Job Compensation, Pay Components and Job Compensation and Pay Components.
6. Type or select an Appointment End Date if applicable.
7. Enter comments.

Helpful hint: If the transaction's Effective Date does not match a Contract Begin Date on the Contract Crosswalk Table, Default Appointment Period will be auto-populated for the Contract Term Period and an Appointment End Date will need to be manually entered.
After required fields are completed, the following options will be available:

- **Save for Later**: Save the transaction as a draft and come back to it later.
- **Cancel**: Cancels the entire transaction.
- **Save and Submit for Approval**: Saves the transaction and starts the workflow, sending it to the appropriate approver. After clicking this option, a message will populate:

```
TBT Request ID=5389 was Submitted, AWE Thread ID=66. (21000,395)
The specified AWE action was completed for the TBT Transaction
```

**Helpful hint**: Users should make note of the TBT Request ID for future reference.

**View the transaction status**

After the transaction is submitted for approval, there will be an option to view where it sits in the approval chain by following these steps:
1. Visiting the HCM Community Users dashboard using this path: 
   **NavBar > CU Resources > Business Tools > HCM > Employee Self Service > HCM Community Users.**

2. Clicking the Pay Actions tile.
3. Clicking **Transaction Status**.

4. Entering parameters to search for transactions. The system displays a list of transactions matching this criteria.
5. Right-clicking on the Related Content indicator and clicking View Approval Chain. Helpful hint: Some faculty transfers on the Boulder campus will show two approvers in the Approved box.

Verifying Transfer Approval

Once the Transfer transaction has been approved, users can verify the information has been updated. To do this, navigate to Job Data from the HCM Community Users dashboard: Non-Pay Actions tile > Job Information > Job Data.
2. Verify the Transfer row has been added with the correct Effective Date.
3. If this transaction is not for an employee with a new contract, verify the Transfer row has been added with the correct Effective Date.

3. If this transaction is for an employee with a new contract, verify the correct contract parameters are in place.

Click NavBar: Navigator > Workforce Administration > Update Contract Pay NA. Enter the Employee ID. The newest contract ID number will be displayed.

Search Results

<table>
<thead>
<tr>
<th>Empl ID</th>
<th>Empl Record</th>
<th>Contract ID</th>
</tr>
</thead>
<tbody>
<tr>
<td>280143 0</td>
<td>1</td>
<td></td>
</tr>
<tr>
<td>280143 0</td>
<td>2</td>
<td></td>
</tr>
<tr>
<td>280143 0</td>
<td>4</td>
<td></td>
</tr>
<tr>
<td>280143 1</td>
<td>3</td>
<td></td>
</tr>
</tbody>
</table>

If this transaction is not for an employee with a new contract, verify the Transfer row has been added with the correct Effective Date.
4. View the other tabs to verify the data entered on the template is correct.

5. Under Position Management, click Add/Update Position Info. Enter the Position number and Search. Clicking the Budget and Incumbents tab will allow users to verify the Transfer.
