

System Fixes: Aug. 15-19 ^[1]

August 19, 2016 by [Employee Services](#) ^[2]

We rolled out two fixes for transaction pages this week:

- You will no longer receive a PeopleCode error stating “The Selected Employee’s row already has a transaction in their database.”
- You are now able to enter and save Transfer ePAR transactions.

Known Issue: Expert Entry page

When using the Expert Entry page, users have encountered approval errors stating that they need to complete personal data first. To approve the transaction, toggle to the standard version of the transaction page. Check out the revised [Hire](#) ^[3] ^[4] and [Pay Rate Change](#) ^[5] step-by-step guides to learn more about the expert entry functionality.
