What's changing with Hire, Rehire and Additional Job processes? [1]

October 11, 2018 by Employee Services [2]

The HCM upgrade [3] arrives this December. Get an overview of how Hire, Rehire and Additional Job processes will be changing.

What will stay the same?

Tasks and information needed prior to completing a hire will not change with this upgrade. Before transactions are initiated, users must ensure the position and funding are prepared. Review what's needed for a hire in the graphic below.
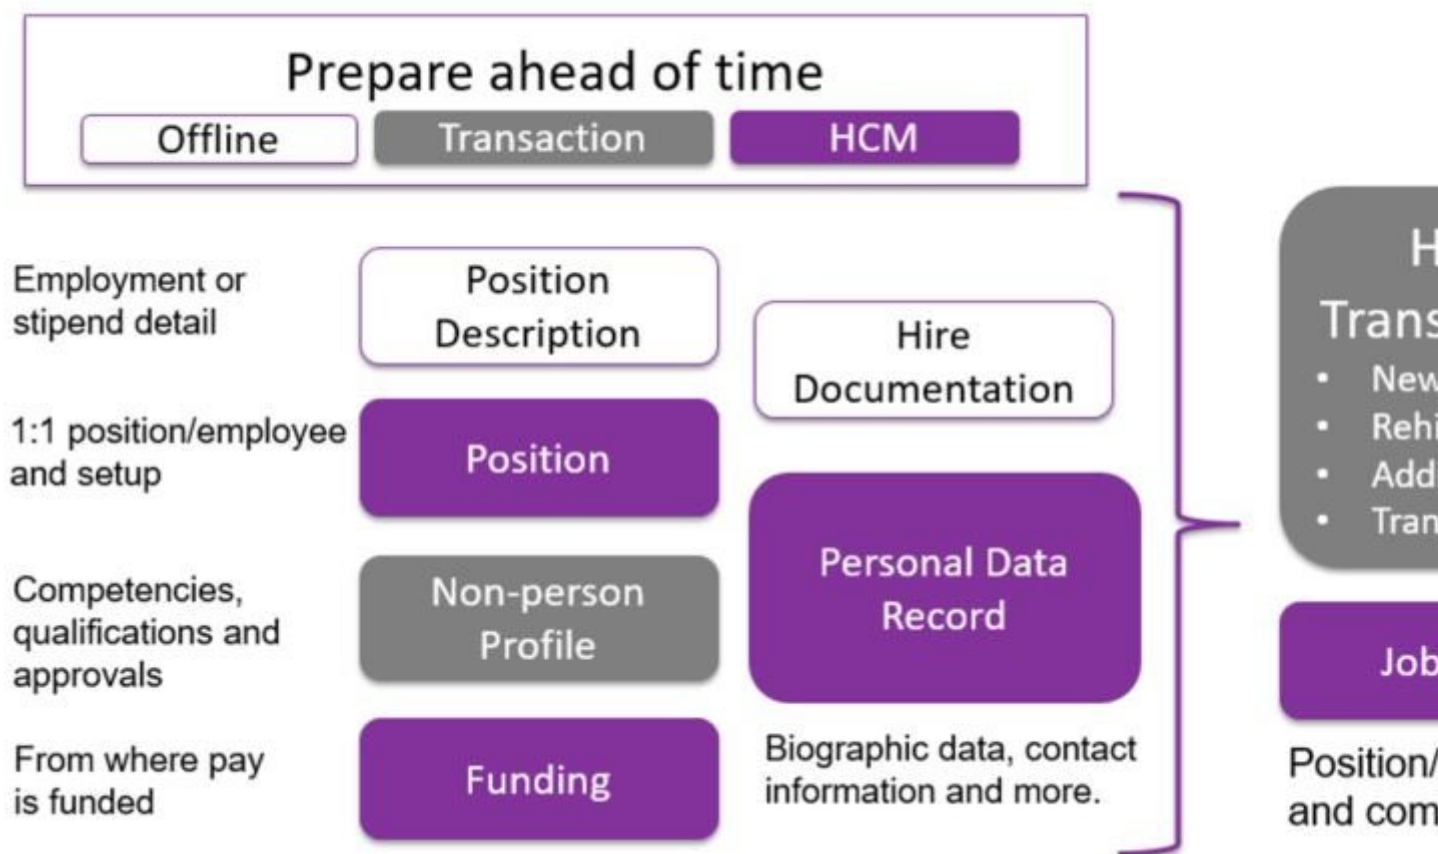

What will be affected by the upgrade?

The upgrade will affect the following processes:

- The current Hire ePAR form will be removed.
- A new Transaction Launch Page will guide users to the correct template.
- The Transfer transaction will be updated to maintain alignment with Hire, Rehire and

Additional Job.

New features for users

- A different look and feel
- Streamlined navigation for faster transaction time
- Position information will populate automatically when the Position number is entered in the template
- A Transaction Launch Page that takes users to templates
- Attachments can be added to the templates
- Expanded use of the Related Content functionality
- Integration with applicant tracking systems Taleo and Avature (used by CU Boulder) for information gathered during recruiting
- Comments (Job Notes) go to Job Data
- System validations to prevent contract set-up errors (such as an overlapping contract) before the transaction is saved
- An updated Transfer template that matches Hire, Rehire and Additional Job

Preview the new Hire, Rehire and Additional Job processes

Begin on the Transaction Launch Page

- New tile on the HCM Community Users screen
- Enter what's known about the person such as: National ID, employee ID, first name, last name
- The search results from HCM and the applicant tracking system will show information we have about the person

The system guides the user to the correct transaction type

- New employee hire
- POI hire
- Rehire an inactive employee
- Rehire an active employee
- Associate an additional job

Personal Data

- New employee hire: Use add a person
- POI Hire and Rehires: Use template
- Additional Job: No action needed for personal data

Associate Job/Position information and complete the transaction

- Enter position number, validate compensation information, etc. on the template
- Route for approval with Save & Submit for Approval
