

Create Marketing Cloud Data Extensions ^[1]

September 10, 2024 by melanie.jones@cu.edu ^[2]

Data Extensions is the term Marketing Cloud uses for an audience. The following wiki explains how to create a Data Extension. It's important to note that despite whoever creates the Data Extensions it's the sender's responsibility to re'Start' it before each send ^[3].

Create Salesforce Report

In Salesforce, create or modify the report that will be used to create the Data Extension. You MUST include:

- Contact ID
- email field the message should be delivered to
- Other personalization fields, like:
 - First name
 - Preferred Student Name
 - Preferred Employee Name
 - Last name
 - others

Examples of Reports prepared for Data Extensions:

	Contact ID [↑]		Student Preferred Name [▼]	Last Name [▼]	UCE
103	0C		Jack	A	ja
104	0C		Sarah	K	sa
105	0C		Sweta	A	sw

Create Data Extension

Follow along with the detailed instructions below and use the 1-pager as a quick reference ^[4] moving forward.

- From the Email app, hover **Interactions** in the navigation, then select **Import** in the dropdown
- Click the **Create** button

Properties

- **Name** your Data Extension
 - Use a name similar to the Report, that aligns with the naming convention of other Data Extensions (DE)
 - **!!IMPORTANT!** Data Extension names can't exceed 35 characters. Accidentally doing so creates an unusable Data Extension that will be seen when sending, and should be deleted (instructions below).
- Leave **External Key** blank
- Adding a **Description** is encouraged but not required

Source

- Choose **Salesforce Objects & Reports** in the File Location dropdown
- Select the **Report** radio button under Salesforce Data Type
- Click the **Select** button

Imports > New Import

 Save  Delete  Cancel Properties**Name** *(required)*

0714SeedList UCCS TXN

Salesforce Objects & Reports ▼

Salesforce Data Source Type *(required)*☐ Object ☒ Report Select

- Search for the Report name in the popup window by **pasting the Report name** and selecting the **Find Now** button
- Once found, **check the box next to the Report name** and select the **OK** button at the bottom of the pop-up.

Look for Reports that meet this criteria

Name :

Note: To ensure a successful send, a column in your report must contain 'Contact ID' or 'Lead ID' in a column name or your send will fail.

Results: Find N

☐	Name	Type	Owner
☒	09 UCD ADV 0714SeedList UCCS TXN	Report	Melanie Jones

Configure Data Extension

- **Included**
 - **Contact ID**
 - **Email Address** (might be UCCS Email, UCB Email, UCD Email, Sys Email, or Email)
 - Any other fields used for personalization
- **Type=Email Address**
 - Whatever email address you are using must have the **Type set to Email Address**
- **?Key**
 - **Contact ID** will ALWAYS be the key
- Select the **Save Config** button in the bottom left

- Scroll to the bottom and **check the box for Send notification email to** and **enter the email address** for the user running the Data Extension [5]
 - *This email address will be notified when the import completes, indicating success or failure.*
- Select the **Save** button at the top of the screen

Update Type *(required)*

Overwrite

Data Quality Settings

Skip rows with bad data

Respect double quotes (") as a text qualifier

Import Qualifications

Skip import if last import was less than hours ago.Fail import if file is older than hours. Allow System Buffer of hours.

Validation

Date Format: English (United States)

Example: 9/16/2022 2:25 PM

Import Completion Settings

Send notification email to **Move Data Extensions & Create Data Extension Folders**

Move Data Extension

Data Extensions can be moved - for technical reasons and/or to stay organized while sending. To move data extensions:

- Hover **Subscriber** in the top navigation.
- Select **Salesforce Data Extension** in the dropdown.

The screenshot shows the Salesforce interface. At the top, the navigation bar includes 'Email', 'Overview', 'Content', 'Subscribers', 'Interactions', and 'A/B Testing'. The 'Subscribers' menu is open, displaying a list of options: 'All Subscribers', 'Lists', 'Groups', 'Profile Management', 'Preference Management', 'Data Extensions', 'Synchronized Data Extensions', 'Salesforce Data Extensions', 'Shared Data Extensions', 'Audiences', 'Shared Audiences', 'Data Relationships', 'Publication Lists', and 'Shared Publication Lists'. The 'Salesforce Data Extensions' option is highlighted with a green box. On the left, the 'Subscribers' sidebar shows a tree view with 'Data Extensions' expanded, and 'Salesforce Data Extensions' selected. On the right, a table of data extensions is visible, with columns for 'Name' and 'Type'. The table includes entries like 'Enrollment 2024', 'Enrollment', and 'Enrollment', all of type 'Standard'.

Name	Type
Enrollment 2024	Standard
Enrollment	Standard
Enrollment	Standard
Enrollment	Standard
Enrollment	Standard
Enrollment	Standard
Enrollment	Standard
Enrollment	Standard
Enrollment	Standard
Enrollment	Standard

- **Check the box** next to the Data Extension you wish to move.
- Click the **Move** button at the top.

Subscribers

[Delete](#)[Move](#)

☐	Name ▲	Type
☒	02 AMC Applica	Standa
☐	02 CON Nursing	Standa
☐	02 CON Nursing	Standa
☐	02 PMED Leads	Standa
☐	02 PMED Leads	Standa
☐		Standa
☐		Standa

- In the pop-up, click the **down arrow** to expand the folder.
- Click the **folder name** of the desired location so it's highlighted in blue.
- Select the **Ok** button in the bottom right.

- The **Data Extension Folder** is used for Journeys.
- The **Salesforce Data Extension Folder** is used for individual email sends.

Create Data Extension Folder

- Select **Subscriber** in the top navigation
- **Right-click on the Folder** you want the sub-folder to be under.
- In the pop-up, select **New Folder**

ELPD Fall 2025 Prospects

Interested in seeing how a Data Extension is configured or the Data that is present after being started?

- Hover **Subscriber** and select **Salesforce Data Extensions** in the dropdown
- Click the **name of the Data Extension**

The screenshot shows the Salesforce interface with the 'Subscribers' dropdown menu open. The dropdown menu lists several options: 'All Subscribers', 'Lists', 'Groups', 'Profile Management', 'Preference Management', 'Data Extensions', 'Salesforce Data Extensions', and 'Shared Data Extensions'. The 'Salesforce Data Extensions' option is highlighted with a green box. Below the dropdown menu, the 'Salesforce Data Extensions' table is visible. The table has columns for 'Name', 'Type', and 'Record Count'. The first row is 'OG Postive Election UCB TXN' with a record count of 1,465. The second row is 'OG Positive Election UCS TXN' with a record count of 413. The third row is 'Standar' with a record count of 11. The fourth row is 'Standar' with a record count of 1. The 'OG Positive Election UCS TXN' row is highlighted with a green box.

Name	Type	Record Count
OG Postive Election UCB TXN	Standar	1,465
OG Positive Election UCS TXN	Standar	413
Standar	Standar	11
Standar	Standar	1

- The default tab **Properties** shows the Data Extension configuration and the count of individuals (413 in this example)

Delete Data Extension

Data Extension must be deleted in two different places. Failure to do so will result in confusion, including the Data Extension still being visible when sending (although unusable, resulting in a failed send).

Data Extensions accidentally created with 35+ characters While you will get an error if you accidentally (corrected spelling) create a Data Extension with more than 35 characters, the reality is that Data Extension will be visible when sending (although unusable). Only the second method of deletion (outlined below) is needed to delete this Data Extension.

First

- Hover **Interactions**, then select **Import** in the dropdown
- **Check the box** next to the Data Extension and click the **Delete** button

- Select the blue **OK button** in the pop-up to confirm

- A green **Successfully deleted the import definition(s)** message will appear

Second

- Hover **Subscribers**, select **Salesforce Data Extensions** in the dropdown
- **Check the box** next to the Data Extension and select **Delete**
