IOS Lead Attributions [1]

July 25, 2023 by m.essa [2]

IOS uses two main buckets to categorize a lead. Source Channel and Lead Source. The first bucket, Source Channel, is the type of channel associated with the lead.

IOS Source Channel Values:

Internal	Third-party or system-based integration
Direct	Direct contact with the Recruitment or Admissions Team
Organic	Organic Marketing Efforts
Paid	Paid Marketing Efforts
Referral	Leads from other systems, or non-IOS websites
Event	Any in-person or virtual event

The second bucket, Lead Source, provides deeper insight into the group of channels associated with the lead.

IOS Lead Source Values:

Audio	Spotify, Pandora, etc.
Calendly	Leads created from the Calendly Integration
Call-In	Direct calls to enrollment or marketing teams
Display	Any online marketing using graphical screens
Email	Direct emails or email marketing efforts
In-Person	In-person events
RFI Form Submission	Request for information submissions
Search	Yahoo, Google, Bing, etc
Social	Facebook, Instagram, LinkedIn, etc.
Virtual	Virtual events
Web	Direct from websites
Webinar	Leads from webinar registrations

SPG-WWW	Springs Web Application

Each of these values is informed by the UTM's (Urchin Tracking Method) associated with the lead. These can be found in the "UTM Values" section on the contact record as shown below.

Source Channel and Lead source will always show a lead's most recent attribution with us. As you see above, We keep the Last and first UTM values. The values in the Last column will always show the most recent information on a lead. the first values are static and will only show the first touch details for a lead. The field "Last UTM Source" will always show the most granular detail about a lead attribution and should be viewed in combination with Source

Channel and Lead Source.

When utilizing UTM values in marketing campaigns, please refer to the standard values we accept for Source and Medium below. Both UTM Content and Term can be free text. Please submit a help ticket [3] if you need a value you do not see listed.

UTM Source	UTM Medium
email	cpc
bing	paid
google	organic
facebook	SEO
instagram	discovery
linkedin	retargeting
twitter	
youtube	
tiktok	
hulu	
spotify	
pandora	
reddit	
gumgum	
GMB	
MOZ	
vanity	
google-pmax
