996 for payroll reports [1]

July 14, 2016 by Carl Sorenson [2]

New versions of m-Fin COMPENSATION SUMMARY and m-Fin PAYROLL TRANSACTIONS support periods 996 and 997 [3]. This is important because we now have PET's in 996.

These reports are available to you now for testing in Cognos QA. **[15-JUL-2016 migrated to production.]** They use the same data as the production versions of the reports. Please leave a comment on this blog post if you test, to let us know your results.
