

Billing limit in italics ^[1]

August 18, 2017 by [Carl Sorenson](#) ^[2]

When a billing or revenue limit is displayed in italics it means that the limit is shared. There is at least one other project that can spend against the limit.

The screenshot shows a web interface for a 'REVENUE AND EXPENDITURE SUMMARY' page. The page title is 'REVENUE AND EXPENDITURE SUMMARY' with a subtitle 'FISCAL YEAR 2018 THROUGH ACCOUNTING PERIOD 2 (Aug 31, 2017)'. On the left, there is a table with a header '2 ACTUAL (B)' and a row with the value '0.00'. On the right, there is a list of project details: PROJECT PRIN, PROJECT FISCAL MAN, PROJECT ACCOUN, PROJECT, PROJECT SPO, PROJ PROPOSAL 162900|V101, PROJECT REF AWARD CODE: 581005023904-02, PROJ AWARD TYPE: G14 -- G14-GEN RES, PROJECT CONTRACT TYPE: LC, PROJECT BILL TYPE: 202 -- UCD FED LOC, PROJECT BILLING LIMIT: 4,994, PROJECT LOC DOCUMENT ID: 8-RH5023904A, PROJECT AWARD START\END: May 1, 2016 \ Apr 3, PROJECT START\END: May 1, 2016 \ May 1, PROJECT BUDG PERIOD START\END: May 2, 2017 \ Apr 3. A red box highlights the 'PROJECT BILLING LIMIT: 4,994' and contains the text: 'Here we are on a speedtype page for a project. We can tell that this limit is shared with at least one other project because the limit is displayed in italics.' Another red box highlights the project details and contains the text: 'A way to see the o m-Fi'. A red arrow points from the text in the first box to the 'PROJECT BILLING LIMIT' value.

Italics billing limit example

What is the difference between billing limit and budget?

The billing (or revenue) limit is an expectation that comes from the project's sponsor whereas the budget is an expectation that is established by CU. Often these are the same, but there are cases where they are not.
