Billing limit in m-Fin AWARD [1]

March 13, 2017 by Carl Sorenson [2]

We are improving the m-Fin AWARD report to show billing and revenue limits when these exist. These limits often are the same as the budget but the people who work on your billing appreciate seeing the limits displayed separately, so that there is no wondering about them.

We also changed the display of over-the-limit amounts so that these appear automatically if they exist. These columns are labeled OLT and ROL (over limit, revenue over limit).

This new version of m-Fin AWARD is available for you to test now, in Cognos QA. **[Now in production.**] Remember, when you run for an award that has no limits, the report isn't different.
