Cognos 11 [1]

April 5, 2017 by Carl Sorenson [2]

m-Fin is moving to Cognos 11 April 24th. While the essential functionality of m-Fin reports will remain the same, there are some obvious differences in the Cognos user interface for finding and running reports. Our existing Cognos system has always been called the *CU Reporting System*. The new Cognos 11 based system instead will be known as *CU-Data*. For more information, including how to test it out right now, see getting ready for CU-Data [3]. There are some videos on this web page. When the videos were created the system had the name *CU Analytics*, but new replacement videos are coming.
