Cognos 11 go-live problem [1]

April 25, 2017 by Carl Sorenson [2]

There is a problem with the links from the CU Portal to the Cognos 11 CU-Data system. These are the *team content* and *my content* links in the CU Portal under *reporting and compliance*. These links take the user into CU-Data, but then m-Fin reports don't run when they are clicked. I will ask that these links be removed today if no fix is found. For now, please simply continue using the links to the Cognos 10 CU Reporting System.
