Compensation Reports [1]

April 18, 2016 by Carl Sorenson [2]

m-Fin COMPENSATION SUMMARY and m-Fin PAYROLL TRANSACTIONS have been set to report expenditures only. Please let us know if this is a welcome change. These versions of the reports are available to you now in Cognos QA. **[Now in production.]**

With PeopleSoft 9.2 based data, these reports started picking up transactions other than expenditures. To make them consistent with what they produced before, we set them to be expenditures only.

Thanks to Andrea Edwards, University of Colorado School of Medicine, Department of Immunology and Microbiology, for brining this problem to our attention.
