

CU-Data Upgrade ^[1]

May 21, 2026 by [Sarju Khadka](#) ^[2]

CU-Data will be upgraded to Cognos 12.1.1 the **night of May 26th**. This is an incremental “dot version” upgrade from Cognos 12.0.3 to 12.1.1. Your m-Fin reports will look and work the same.

What's staying the same Your existing reports, saved views, and scheduled deliveries will carry over without any changes. If you run m-Fin reports today, you'll run them the same way after the upgrade.

What's getting better Cleaner navigation makes day-to-day use a little easier:

- Team content and My content folders are available directly on the homepage.
- The Open Menu panel is reorganized so Reports, Dashboards, Team Content, and Recent/Favorites are easier to find with fewer clicks.

Try it before the upgrade The new version is available now in CU-Data QA. Test your reports before May 26th and let us know what you find.

Questions or concerns? Comment below or email us by **May 25th**.
