Data Unavailable for Student Finance Drills [1]

June 7, 2016 by Carl Sorenson [2]

SF drills are not working this morning because the data is unavailable.

This matters only if you have the authorization to drill from m-Fin FINANCIAL DETAIL to SF (Student Finance) data. There is some kind of trouble with the loading of the SF data. The data warehouse team is has been working on it this morning. m-Fin's drills to the SF data will throw an SQL error message or just spin. I will post a follow up comment on this blog post when the problem is resolved and the drills are working.
