

Decommission of the Old CU-Data Environment ^[1]

January 14, 2020 by [Sarju Khadka](#) ^[2]

We went live with the new CU-Data on December 10th, 2019. It has been over a month and everything has been running as expected. UIS/IRM has been migrating users' content over to the new environment on a weekly basis. If you haven't moved your 'My Content' from the old environment to the new environment, this is the time to do it.

UIS/IRM will decommission the old CU-Data on **Thursday, January 23rd**, after which you will no longer be able to access any unmoved My Content. If you have not already moved your content from your 'My Content' to your personalized Dropzone in the Team Content, **please do so now!**

Use this link to access the old CU-Data environment - <https://cu-dataold.prod.cu.edu/bi/> ^[3].
Login then follow these detailed procedures ^[4] to move your content.
