

Enhancements for auxiliaries ^[1]

September 6, 2017 by [Carl Sorenson](#) ^[2]

We have a new report, and some changes to an existing report, that are meant for auxiliary funds (2x).

m-Fin GROSS MARGIN COGS is new. It runs 2x funds only, and only for cost-of-goods-sold (cogs). It shows revenues and cogs and then nets them together for a gross margin.

m-Fin REVENUE AND EXPENDITURE TOTAL has changes. Some column names that show up when running with the prior FY have been set to correspond to the column names in the m-Fin GROSS MARGIN COGS report. New columns for percent of revenue have been added, available as an optional EXTRAS choice.

These reports are available to you now for testing, in Cognos QA: **[22Sep2017 migrated to production]**

- m-Fin GROSS MARGIN COGS
- m-Fin REVENUE AND EXPENDITURE TOTAL
