ePers reports [1]

May 5, 2017 by Carl Sorenson [2]

CU-Data went live with two ePers reports. The other two are in testing now. These are the two ePers reports that run for org or campus. If you have been a user of these reports you are welcome to test. The test environment is cu-data.qa.cu.edu. The reports should be essentially the same as they were in the CU Reporting system, now configured to work in the new CU-Data system: **[these are in production now]**

- ePers > ePERS Summary by Org
- ePers > Uncertified ePERS by Org or Campus

Send email when Published:
Yes
