Fix To Multiple Fund Select [1]

January 8, 2015 by Carl Sorenson [2]

We've fixed m-Fin FINANCIAL DETAIL so that it runs for all selected funds. When more than one fund was selected it was really just using the first one. This version of the report is available now in Cognos QA. **[12-Jan-2015 migrated to production.]** Since this fixes a defect it will be migrated to production by tomorrow (Fri 09-Jan-2015) if no problems are found.
