Fix Pack 4 [1]

November 10, 2014 by Carl Sorenson [2]

Bringing the Cognos software up to date will protect us against the problem we still have occasionally with long load times [3]. The latest release from IBM/Cognos is known as Fix Pack 4. It was applied to Cognos QA over the weekend. If no problems are found in testing then Fix Pack 4 will be applied to Cognos production this weekend, Nov 14, 2014. If you have a chance this week, please try some reports in Cognos QA [4] to confirm that Fix Pack 4 is ok.
