FY's 2007 and 2008 to be reloaded [1]

June 29, 2016 by Carl Sorenson [2]

Fiscal years 2007 and 2008 will be reloaded into the data warehouse this evening. These fiscal years were getting their payroll detail fixed but due to a dropped connection did not completely reprocess so now are incomplete. The problem also happened with FY 2009 but has already been corrected for that FY. Because m-Fin's data comes from the data warehouse, this affects m-Fin reports run for either of these two fiscal years. This does not affect reporting of current status. m-Fin reports for FY 2016 accurately reflect CU's PeopleSoft Finance data.
