Issue running m-Fin reports? [1]

December 4, 2018 by Sarju Khadka [2]

Problem

You are in CU-Data homepage. You click on a report under your recent menu intending to run that report. But nothing happens, as if the report is broken.

Solution

Render the report from Finance folder instead; click on ‘Team Content’ then Finance and the report link. You should then be able to run reports from your recent menu on subsequent runs.

Send email when Published:
Yes
