m-Fin BAE BY MONTH – SUMMARY [1]

September 27, 2012 by Carl Sorenson [2]

About a year ago we released the m-Fin BAE BY MONTH – SUMMARY [3] report. The report was set to show only the amounts directly impacting a speedtype's available balance. Now we are increasing the flexibility of the report to make it useful for purposes beyond just available balance. There are three new prompts for:

- whether to render an *available balance* section,
- when to show the *assets and liabilities section*, and
- what revenues to include in the *BAE* section.

These prompts are on the second page of prompting, available via the *Next* button.

Other changes to the report include

- f-and-a type in header,
- subtotal for sal, ben, and wages, and
- drilling on assets and liabilities.

This new version of the report is available to you now in Cognos QA **[08-Oct-2012 The report is now in production.]**. Give it a test drive. Leave your feedback below.
