

m-Fin GROSS MARGIN COGS drill fix ^[1]

August 1, 2018 by [Sarju Khadka](#) ^[2]

Drills from the m-Fin GROSS MARGIN COGS report were returning incorrect dollar amounts. This is now fixed. The error happened only when the report was run using the optional page subgroup prompt available on the second prompt page of the report.

The fixed version of this report has been tested and migrated to production.

You will also notice that the drills now open in a new window. This was one of the welcomed changes with the Cognos upgrade we just went through back in June.
